SUNORA X

Sodium-ion jump starter

SX-S08

Start your vehicle. Charge on the go.

Sodium-ion cells for vehicle jump starting, phone charging and temporary lighting.

80 Wh	1350 A	-40 °C
Battery capacity	Peak current	Rated cold starting

Emergency functions — Vehicle starting / mobile charging / temporary lighting

Start your vehicle. Charge on the go.

Sodium-ion jump starter • Specifications

80	1350	-40	Sodium-ion
Wh Battery capacity	A Peak current	°C Rated cold starting	Battery type

Designed for real-world applications

Emergency jump starting

1350 A peak current; rated cold starting at -40°C.

Phone charging on the go

Charge your electronic devices on the go.

Sodium-ion cells

Emergency lighting helps you prepare for the road.

Key specifications

KEY SPECIFICATIONS

Battery capacity	80 Wh
Battery chemistry	Sodium-ion
Peak current	1350 A
Cycle life	4000+ cycles
Rated cold-start temperature	-40°C
Functions	Jump starting / charging / lighting

Emergency functions	Vehicle starting / mobile charging / temporary lighting
Applications	Vehicle emergencies / device charging
